

21-22
NOVEMBER 2022

Online Event

Rethinking the Future for the better:

environment and social inclusion
in scientific events

SIEP Italian Chapter of IALE

Program of the event

21

**November 21st Morning
(9.00 am – 12.00 pm CET Time)**

Presentation of the event

Environmental impact of social events

How to calculate environmental impact
Theory and practice exercise with case study

21

**November 21st Afternoon
(2.00 pm – 5.00 pm CET Time)**

Environmental compensations

Social inclusion in scientific events

Online events beyond the emergency:
opportunities and critical issues from a
sociological perspective

22

**November 22nd Morning
(9.00 am – 12.00 pm)**

IALE 2022 European Landscape Ecology
Congress: experience of the first online
congress

Do we create the next scientific event?
Working groups with practical activities

Speakers

Sarvenaz Sarabipour, *Johns Hopkins University*
Veronica Allegretti, *University of Turin*
Riccardo Bruno, *Politecnico of Turin*
Simona Gradinaru, *International Association
of Landscape Ecology Europe*
Bellio Alessandro, Silvia Alessandro,
Nature Positive Program di Etifor

Organizing and scientific committee

Claudia Canedoli, Donatella Valente, Enrico
Pomatto, Guglielmo Di Chiara, Luca Battisti,
Noemi Rota, Sebastian Brocco

Presentation of the event

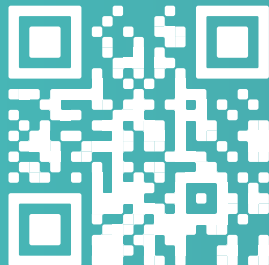

COP-26 suggests that huge efforts are needed to re-think our behaviors and actions to reduce human impact on Earth. Scientific conferences, meetings, and similar events may have a huge environmental impact because of organizing and travel emissions and offer limited possibilities of social inclusion for researchers with different socioeconomic backgrounds. At the same time, in-presence meetings offer multiple benefits to people in terms of strengthening relationships, networking, or mental health due to positive human interactions. Because of these conflicting aspects, and the need to re-thinking the way we plan our events and not come back to the “business as usual” way, we propose this series of meetings to discuss together different aspects, environmental or social, related to our meetings.

Our idea is to discuss together how we can organize scientific events in a more sustainable and social-inclusive way. We think that science has the responsibility to show new ways of behaving sustainably.

During this events participants will have the possibility to learn about environmental impacts, calculations, compensations, and about social inclusivity.

The last event will be a real working group activity, where participants will be involved in first person in creating their own scientific event!

Registration

- Registration is open until 18th November
- To register compile this online form:

Link: <https://qrco.de/bdSPQc>

Everyone can attend the event, from academics to event organizers or people interested in the topic. There is a limited number of 30 participants.

Certificate of attendance

The course is 6 hours of theory (21st November) and 3 hours of practice (22nd November).

To receive the certificate of attendance you must attend at least 4 hours of theory and 3 hours of practice.

Fee

The event is free of charge

Language

The event will be held in English
